**Thermofoil**

Thermofoil is a thick vinyl film bonded permanently to a warp-resistant engineered wood core. Because the color is consistent throughout the film, the surface is durable, easy to clean, and resistant to chipping and cracking.

**Subtle Sophistication**

Two-tone kitchens are a stylish and versatile way to add personality and visual interest to your home. Use lighter tones on upper cabinets and darker shades on lower cabinets to draw the eye upward and give a room a more open, airy feel. Contrasting colors can also highlight key features, such as a beautiful island or unique backsplash, drawing attention to the items you want to showcase.

**Hardwood**

Hardwood cabinetry has a dense structure and comes from a combination of deciduous trees such as maple, beech, birch, or poplar. Natural colors range from light blond to dark reddish-brown tones. These hardwoods may contain mineral streaks, slight differences in graining, and color variations.
