Duraform™ Textured Cabinets: What to Expect

Duraform™ uses a highly-technological manufacturing process to bond foils and coatings to medium density fiberboard, high density fiberboard, and similar materials to achieve a product with exceptional stability, consistency, and durability. Duraform Textured product comes on a complementary painted cabinet box. Exposed sides and frames will be painted.

Care & Cleaning

While our laminate, painted and wood finishing processes promote durability, care should be taken to preserve the original factory finish:

- › Wipe up spills immediately
- › Use mild soaps only
- › Be sure to read all cabinet care guidelines and cleaning product instructions carefully

Environmental Factors

Cabinetry added at a later date may not match the original cabinets installed. This may be due to:

- › Exposure to sunlight, smoke and chemicals
- › Change in door samples or displays due to age (they may no longer be a true color representation)

Because of environmental factors, American Woodmark is not responsible for texture differences or color and wood grain variations in wood or laminate materials used in your cabinets.
